

Capacitive Coupling Clamp EFTC 105

The Capacitive Coupling Clamp, EFTC 105, provides the ability of coupling electrical fast transient pulses to the shielded cables

The mechanical characteristics of the EFT-Clamp are identical to those of the clamp proposed by IEC 61000-4-4, EN 61000-4-4.

Dimensions: W * H * L
Incl. coaxial connection cable, SHV

140 * 180 * 1050 mm³
1 m long
